Need parts? Contact Koike Technical Services Department @ ext.470

Since safety is a top priority with Koike, please have only qualified technicians do your maintenance. Is saving a few dollars with the possibility of an untrained technician causing injury to himself or someone else worth it? This equipment employs high voltage and only qualified technicians or electricians should work on it. High voltage can cause serious injury or death! Damage to equipment can happen in a second, please use the upmost caution when maintaining all your equipment, including locking out electrical connections as needed or required. Please do not substitute parts we recommend.

If you call our technical support team for help, follow the instructions given.

If we suggest you need a qualified technician, take our word for it, we are here to assist and help you, our valued customers.
