

KOIKE ARONSON INTRODUCES A WATER TABLE

ARCADE, NY --(April 2009) --Koike Aronson/Ransome, Inc., a leading manufacturer of cutting and positioning equipment for the metalworking industry, introduces a highly efficient water table for fabricators, steel service centers and shipyards. The new table, which is manufactured at Koike's New York facility, can cost up to 40% less to operate than a downdraft table with a fume collector. Lengths of 10 ft. to 40 ft. are available in widths of 5 ft., 6 ft., 8 ft., 10 ft. and 12 ft. Custom sizes are also available.

The Koike water table is ideal for mild steel cutting in thicknesses ranging from gauge material to 6 in. It features a pneumatic baffle design that controls the water level through air and manual valves for simple operation. The slat frames can be removed for easy access to the slag pans and the pans can be removed for easy cleaning. The slats themselves are easy to replace.

Koike Aronson/Ransome, Inc. designs and manufactures one of the world's broadest lines of welding positioners and thermal cutting products, as well as portable and gas apparatus equipment. Koike Aronson/Ransome, Inc. Arcade, NY, USA.
