

# Cross Slide Plus™

**Built-in oscillation function**

- ✓ **Vertical and Horizontal Oscillation function**
- ✓ **6 or 10 inch mechanical stroke**
- ✓ **Compatibility with most welding process**
- ✓ **Manufactured by Industry Experts**
- ✓ **Made in the USA**

The Cross Slide Plus™ is a multi-purpose mechanized cross slide with oscillator integration in one. It eliminates the need to purchase the cross slide and oscillator separately. An option that can be added to new or existing manipulator booms.

The Cross Slide Plus™ provides final adjustment of welding torches or tools, or dynamic positioning to keep a torch on track with a seam. It also has the unique ability to actively move the torch in a weave or oscillation pattern while achieving broader weld bead coverage.

## FEATURES

- All-in-one cross slide and oscillator
- Cross slide position mode
- Precision arc oscillation
- Independent parameter settings
- Mitsubishi handheld HMI control
- Left speed control adjustment
- Right speed control adjustment
- Left dwell adjustment
- Right dwell adjustment
- Oscillation width adjustment
- Center adjustment “on-the-fly”
- Servo drives
