

CNC PLASMA & OXY-FUEL CUTTING MACHINE

SHOPPROXHD: REDEFINING THE ICONIC SHOPPRO PLATFORM.

The ShopProXHD™ represents the evolution of high-performance cutting machines, marking another stride in Koike's century-long legacy of excellence. Embodying the principles of "Built to Last," the ShopProXHD™ was developed in response to valuable feedback from fabricators and metalworkers, ensuring the same unrivaled reliability and precision characteristic of all Koike cutting systems by combining premium features with compact design, catering to the needs of fabricators, even in limited workspace.

Dual Side Drive with Helical Gear Rack with AGMA 12 Grade Ground Pinions:

Ensures smooth, accurate motion with minimal vibration.

Precision Ground Linear Guideways With Preloaded Linear Bearings:

Designed for tighter tolerance, longer service life and high output.

Precision Helical 10:1 Gearboxes:

Helical 10:1 Gearboxes with 550 oz-in NEMA-34 servo motors deliver precise, smooth, and accurate motion for superior cut quality.

ShopProXHD™ — Everything You Love, Taken Further:

The ShopProXHD™ keeps everything fabricators love about the ShopPro™ platform and pushes it to the next level. With increased plasma capabilities paired with a deeper cutting table for longer time in between cleanouts (three times more slag capacity than shallow table designs), the ShopPro XHD™ delivers precision, endurance, and the same rugged reliability ShopPro™ is known for.

21" ALL-IN-ONE MOTION CONTROLLER PC

FEATURES AND SPECIFICATIONS

- 21-Inch All-in-One PC
- Windows® 11 Embedded
- Enclosed Roll-A-Round CabinetWith 4 industrial casters (and 2 brakes).

HARDWARE SPECIFICATIONS:

- Intel® i5 Processor (Or Equivalent)
- 256GB SSD Hard Drive
- 8GB DDR3 RAM (Or Better)
- USB 2.0 Ports (x5)
- Included Keyboard and Mouse

ADDITIONAL FEATURES:

- Built-in Wireless Communication
 Enables remote diagnostics, troubleshooting, and monitoring for quick error response.
- Built-in Emergency Stop Button

SOFTWARE FEATURES:

- PRO Version Software Package
- On-Board Completely Integrated FlashCut 2D CAM/CAD Package
- True Shape Nesting
- Customizable Cut Charts
- Customizable Default Lead-In, Lead-Out Strategies
- Silhouette Image Import
- Tabbing of Part
- DXF/DWG Import
- Overburn Support
- Marker and Plasma Marking
- DXF Export
- Advanced Text Including True Type Font Support Without Exploding and Curved Text Around Any Shape
- Part Shading
- 3D Cutting Simulation

- · Automatic Lead-In on Restart
- Dynamic THC On/Off
- Progress Meter
- Move to Point in Viewport
- Rip Cutting
- Smart Touch Off
- Shape Library
- Bridge Entities Tool
- Shape Welding Tool
- Multi-Layer Color Image Import
- Import of Parts From External Files
- Multi-Sheet and Fill Sheet Trueshape Nesting
- Corner looping
- · Advanced Lead-In, Lead-Out Editing
- Animated 3D Cutting Simulation
- Advanced Small Hole Processing

YOUR CHOICE BETWEEN THREE TABLE SIZES

Meet your personal production and space requirements with three sizing options.

Laser Pointer

Provides operator with a clear visual indicator for plate alignment and torch positioning.

Torch Height Lifter

Servo-driven torch height control delivers fast, precise positioning. A linear guideway with ball screw enhances motion accuracy, while the reverse-mounted lifter and stainless steel cover protect components from harsh cutting conditions.

Deep Table Design

Provides longer cut times between clean-outs and holds three times as much slag as shallow table designs.

Integrated Emergency Stop Buttons

An E-Stop is located on each saddle for quick shut-off of machine motion and cutting operation.

Integrated Forklift Pockets

Forklift pockets for easy installation and relocation housed right into its fully welded frame. (Note: A forklift truck is required at each end when lifting from short side).

Curved Removable Cutting Slats

Two removable slat support frames are designed to make clean out easier. Curved cutting slat design minimizes impact on work piece and increases time between slat replacement.

Curved Removable Cutting Slat Frame

Laser Pointer

Torch Lifter

Deep Table with Forklift Pockets

Equipment Options

KOIKE 300L Oxy-Fuel Cutting Torch

Koike cutting tips are one of the most technically advanced of its kind, assuring greater safety in reducing the risk of flashback and backfire, while providing unmatched cutting quality.

Features a lifetime warranty when using genuine KOIKE cutting tips.

Pneumatic Scribe Marker

Create single point marks (drill mark) or scribed lines on mild steel, stainless steel, and aluminum. Mark bend lines, parts and serial numbers, names and custom designs.

- Fixed Location on Master Carriage
 Manual On/Off
- Marking Software Included 4" Stroke

Manual Plasma Bevel Station

Allows for plasma beveling in the rail axis with non-contour mechanical adjustment from +/- 0 to 45°.

Downdraft Table*

Features a bolt on design fume extraction hood, mounted to the backside of the cutting table. This option allows extra removal of fume during plasma cutting. It includes one or two, 12 in. diameter cut outs for the supplied fume collector.

*Not available for oxy-fuel cutting option.

Water Additive

Prevents bacterial growth in water table. Also features a rust inhibitor to minimize rust in the table, slats and on plate surfaces and parts. Contact KOIKE for details.

Pneumatic Dynamic Control Water Table

Integrated pneumatic air bladder utilizes your shop air to raise and lower the water level of cutting table through an easy manual valve system.

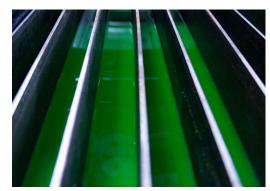

Oxy-Fuel Torch Option

Pneumatic Scribe Option

Get more use out of your ShopProXHD $^{\text{TM}}$

ShopPipe[™] expands the use of your ShopProXHD[™] by offering a true plug-and-play attachment for pipe cutting operations, featuring intuitive software, quick setup, and durable, low-maintenance components designed to handle tough shop conditions. Its fold-down head design saves valuable floor space and its precision direct-drive chuck system ensures accurate pipe rotation, outperforming friction-driven alternatives that rely on rollers or belts. Built-in slag pans and a through-hole chuck design keep the work area cleaner by capturing debris and efficiently venting smoke.

EASY TO SETUP AND ADJUST PIPE FOR CUTTING

SPACE SAVING FOLD DOWN TOOL HEAD (PATENT PENDING)

REMOVABLE SLAG PANS FOR EASY CLEAN UP

THROUGH-HOLE CHUCK DESIGN WITH BUILT-IN SPARK ARRESTOR

| SPECIFICATIONS | | |
|----------------------------------|---|--|
| Maximum Pipe Diameter | 6 in. (152 mm) with 1/2 in. (12.7 mm) wall | |
| Maximum Pipe Length | BASED ON TABLE WIDTH | |
| Number of Supports in Base Model | 3 | |
| Maximum Weight Capacity | 150 lbs. per support (max total weight 600lbs.) | |
| Drive Means | Direct drive with chuck | |
| Fume Collector Connection Point | Yes | |
| Spark and Slag Pan | Yes | |
| Spark Arrestor | Yes | |

HYPERTHERM

Hypertherm® MAXPRO 200®

Dubbed the industry workhorse because of its power and 100% duty cycle, the **MAXPRO200® LongLife®** plasma cutting system is designed for your heavy-duty, high-capacity automated and handheld cutting and gouging applications.

With a mild steel pierce capacity of 1 1/4", the easy-to-use system operates with either air, oxygen, or nitrogen plasma gas, and combines fast cutting speeds and quick process changes to maximize productivity. Optimized cutting parameters are set and controlled in a single step for consistent, automated results, while advanced diagnostics simplify troubleshooting and maintenance. Optional serial communications can be

Advanced Hypertherm consumable designs – including **LongLife®** technology – improve cut consistency and significantly increase consumable life to lower your cost per part.

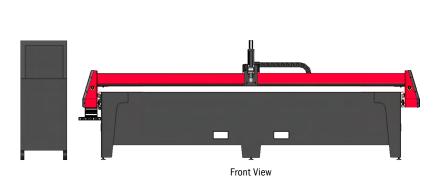

Hypertherm® PowerMax65®, PowerMax85®, PowerMax105®, PowerMax125®

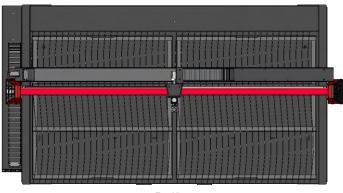

The **Hypertherm® Powermax®** series comprises of professional-grade plasma systems engineered for maximum productivity in both manual and automated metal cutting and gouging applications.

Capable of handling materials up to 38 mm (1-1/2") thick, these systems offer exceptional reliability, superior cut quality, and user-friendly operation. Innovative single-piece cartridge design extends consumable life by up to five times, reducing operating costs and downtime.

Built to withstand extreme conditions, **Powermax®** systems are tested for durability, ensuring consistent performance over a lifespan exceeding ten years. With a wide array of torch and cartridge options, users can easily tackle diverse cutting and gouging tasks, enhancing versatility across various applications.
