**Cutting/Welding/Positioning
Equipment and Solutions**

REBUILT TO LAST

**“Have Your Positioning Equipment
Restored to Like-New Condition.”**

Benefits of a Rebuilt

- **Extended Life:**

Our reconditioning program will substantially extend the life of the positioner.

- **Long Range Solution:**

Our rebuilds are a long range alternative that eliminate down time and costly repairs.

- **Inspection & Audit:**

KAR specialists will perform a thorough examination of existing equipment, on-site or at our facility, to determine the most viable options for upgrading and reconditioning

- **Experience:**

Benefits from the same experience and technical knowledge that is applied during original manufacturing.

- **Current Specifications:**

Existing positioning equipment can be upgraded to the latest performance standards and benefit from current design and engineering concepts.

- **Replacement Parts:**

Koike Aronson is the only source for original replacement parts.

Restored to Like-New Condition

- **Inspection & Analysis**
- **Parts Replacements & Upgrades to Current Specifications**
- **Complete Testing**
- **Compliance with Latest Safety Requirements**
- **Sand Blasting & Painting**
- **Like New, 1-Year Warranty on all Replacement Parts & Labor**
